

## GS Custom Bullets USA Newsletter, April 2013

It is with great excitement that we can finally let all our US customers know that ***WE ARE NOW MANUFACTURING IN THE UNITED STATES!***

Our place is located in southern Michigan. We are just over the state line from Indiana, about 25 minutes from South Bend and Notre Dame University.

The journey of getting set up and starting to manufacture in the USA has been a long one, and we thank everyone for being patient while we were gearing-up. We are excited to finally be "***Made in the USA***", and ***locally supplying our customers!***

Let me give you a few more details:

The bullets you order here are the same as the bullets you receive from South Africa. We have gone to great lengths to ensure that the bullets made here match our bullets from SA. No need to re-develop your loads. However, if you haven't ordered in a couple of years, there have been some improvements to the bullet designs, but it should only require some sighting in on your part.

Our current production is limited, but we are ramping up. We are adding to our production capacity as soon as possible to avoid waiting periods, and supply on an off-the-shelf basis as much as possible.

The factory here in the US is owned and managed by me, Gina Schultz-Pienkowski, together with my husband Anthony.

General inquiries and orders are handled by me, Gina. Some of you might remember me from the factory in South Africa where I took care of administration and orders for the past 13 years.

Anthony handles technical inquiries on orders and reloading, as well as inquiries regarding bullet manufacturing.

Anthony joined the GS Custom Team in 2009 as our US representative. He is a certified ballisticsian, a graduate of the American Gunsmithing Institute and served in the US Navy as a Special Forces Armorer and Rangemaster.

We look forward to hearing from you, and as far as is possible, will strive to offer our customers the best service and products.

## **MORE NEW DEVELOPMENTS!**

***M98 Bore Cleaner*** is now available in the US too! M98 is still the fastest bore cleaner for removing copper and nitro fouling. It has been available in SA from many gun shops and is arguably the most popular bore cleaner sold in South Africa. What isn't arguable is how well M98 Bore Cleaner works, provided you follow the instructions. We guarantee that you will remove fouling from even the cleanest of guns! This is because M98 works through a unique chemical process, yet is not harmful, hazardous or odorous - no more scrubbing!

M98 will be available at an introductory price of \$7.99 per 4 oz bottle for a limited period of time. Hurry and [order yours today!](#)

## PLACING ORDERS

Placing your order is quick and easy.

Go to our [website](#), hit the [products tab](#) and click on your product type. Complete the order form and submit. I will get in touch with you within 48 hours with confirmation of your order and payment information. If you don't hear from me within 48 hours, we probably had a glitch in the system somewhere, so please feel free to try again - or e-mail your order to [gina@gscustomusa.com](mailto:gina@gscustomusa.com); or phone me on 260-715-5079.

If you need any technical back-up or have questions that are not answered on the very extensive and informative [website](#) that we share with our SA factory, you can contact Anthony by e-mail at [anthony@gscustomusa.com](mailto:anthony@gscustomusa.com), or call him on 260-715-5078.

## AMMUNITION LOADED WITH GSC BULLETS

Have you given up reloading, or just don't have the time for it this season, but would still want to use GS Custom Bullets on your hunts? Contact the guys at [Monolithic Munitions](#).

They will deliver to you the best hand made ammunition, factory direct. Their cartridges are the result of several years of load development and countless hours out at the range. The result is top quality ammunition with the best bullets to discerning hunters.

We approve Monolithic Munitions as a reloader of GS Custom Bullets.

### How to stay updated on developments at GS Custom Bullets?

We will try to send out a quarterly newsletter, as time and workload allows. Also like us on Facebook, where more regular information and updates will be posted.
